1966 INDEX OF ARTICLES PUBLISHED IN

MATERIALS IN DESIGN ENGINEERING

INDEX OF FEATURE ARTICLES

ALUMINUM AND ITS ALLOYS

Ceramic Fiber Reinforced Metal Composites Provide High Strength With Light Weight--Dec, p 83
Cryogenic Face Seal--Apr, p 108
Forecast '66-Metals--Jan, p 76
Four-Shot Flash Cube--Apr, p 98
Metals Fight Back--Oct, p 85
Preventing Stress Corrosion Cracking of High Strength Aluminum Parts--May, p 70
Printed Circuit Board--Apr, p 102

BERYLLIUM

Forecast '66-Metals--Jan, p 76
Metals Fight Back--Oct, p 85

CARBON, GRAPHITE

New Inorganic Filaments Are Stiffer and Lighter Than Metals--Feb, p 82
Three Ways to Protect Graphite Against High Temperatures--June, p 93

CASTINGS

Automobile Wheel Cover--Apr, p 104
Close Tolerance Malleable Iron Castings Now Available--Apr, p 90
Guide to Engineering Castings, A--Mar, p 83
High Strength Steel Castings Stand Up in Rugged Environments--Feb, p 67

CERAMICS, GLASS

Ceramic Fiber Reinforced Metal Composites Provide High Strength With Light Weight--Dec, p 83
Ceramic Fibers Provide Heat Resistance at Low Cost--Dec, p 94
Ceramic Parts--Nov, p 109
Explosive Formed Ceramic Parts--May, p 76
Fiber Reinforcement Strengthens Ceramic Parts--July, p 88
Forecast '66-Plastics & Nonmetallics--Jan, p 82
Helicopter Landing Light Cover--Apr, p 109
New Inorganic Filaments Are Stiffer and Lighter Than Metals--Feb, p 82
Printing Plate--Apr, p 103

COATINGS, FINISHES

Attitude Control Thruster--Apr, p 112
Automobile Wheel Cover--Apr, p 104

Chromized Steel Sheet Resists Oxidation and Corrosion--May, p 78
Coated Refractory Metals Beat Heat and Oxidation--July, p 83
Color Comes To Chromium Electroplates--Aug, p 73
Composite Coating Increases Life of Superalloy and Stainless Steel Parts--Sept, p 92
Electrodeposited Organic Coatings, Part I--Oct, p 70 --- Part II--Oct, p 72
Flame Sprayed Coatings--Feb, p 89
Forecast '66-Coatings & Finishes--Jan, p 88
Four-Shot Flash Cube--Apr, p 98
Guide to Prepainted Metal Finishes, A--Nov, p 89
How Auto Engineers Are Attacking the Corrosion Problems--Dec, p 78
How to Protect Magnesium Against Corrosion--Apr, p 82
Lower Cost Porcelain Enamels--June, p 96
New Developments in Vinyl Coatings--Dec, p 106
Printed Circuit Board--Apr, p 102
Three Ways to Protect Graphite Against High Temperatures--June, p 93

COMPOSITES

Asbestos Reinforced Plastics Resist Heat and Chemicals--Apr, p 92
Ceramic Fiber Reinforced Metal Composites Provide High Strength With Light Weight--Dec, p 83
Clad Metals--July, p 101
Composite Bearing--Apr, p 111
Fiber Reinforcement Strengthens Ceramic Parts--July, p 88
How to Select Materials for Composite Panels--Mar, p 72
New Inorganic Filaments Are Stiffer and Lighter Than Metals--Feb, p 82
Printed Circuit Board--Apr, p 102

COPPER AND ITS ALLOYS

Composite Bearing--Apr, p 111
Fluorescent Lamp--Apr, p 101
Forecast '66-Metals--Jan, p 76
Metals Fight Back--Oct, p 85

CORROSION RESISTANT PROPERTIES AND MATERIALS

Chromized Steel Sheet Resists Oxidation and Corrosion--May, p 78
Composite Coating Increases Life of Superalloy and Stainless Steel Parts--Sept, p 92
Don't Overlook Refractory Metals for Corrosive Environments--Nov, p 106
Forecast '66-Metals--Jan, p 76
How Auto Engineers Are Attacking the Corrosion Problems--Dec, p 78
How to Protect Elastomer Parts From Ozone Attack--Aug, p 82
How to Reduce Corrosion of Seals and Shafts--Mar, p 74
How Water Affects Plastics--Nov, p 93
New Amide-Imide Plastics Withstand Continuous Use at 600 F--Oct, p 80
New PH Stainless Steels Are Stronger and Tougher--Sept, p 95
Preventing Stress Corrosion Cracking of High Strength Aluminum Alloy Parts--May, p 70

ELECTRICAL AND ELECTRONIC PROPERTIES AND MATERIALS

Electronic Instrument Case--Apr, p 105

Fluorescent Lamp--Apr, p 101
How to Evaluate Materials for Specific Environments--Mar, p 80
New Amide-Imide Plastics Withstand Continuous Use at 600 F--Oct, p 80
Printed Circuit Board--Apr, p 102
Transfer Molded Epoxies Upgrade Electronic Parts--Mar, p 76

FABRICS, FELTS, FIBERS

Asbestos Reinforced Plastics Resist Heat and Chemicals--Apr, p 92
Ceramic Fibers Provide Heat Resistance at Low Cost--Dec, p 94
Ceramic Parts--Nov, p 109
Explosive Formed Ceramic Parts--May, p 76
Forecast '66-Metals--Jan, p 76

GENERAL

Forecast '66-Materials Applications--Jan, p 93
Forecast '66-Materials Consumption--Jan, p 104
Forecast '66-Materials Problems--Jan, p 108
How to Evaluate Materials for Specific Environments--Mar, p 80
How to Use A Materials Engineering Department Effectively--July, p 98
Systems Approach to Forecasting Materials Requirements, The--Dec, p 102

HEAT TREATMENT

Forecast '66-Metals--Jan, p 76

HIGH TEMPERATURE PROPERTIES AND MATERIALS

Ceramic Fibers Provide Heat Resistance at Low Cost--Dec, p 94
Coated Refractory Metals Beat Heat and Oxidation--July, p 83
Don't Overlook Refractory Metals for Corrosive Environments--Nov, p 106
Fiber Reinforcement Strengthens Ceramic Parts--July, p 88
From Gas Turbines to Furnace Parts--Cobalt Alloys Beat Heat--Feb, p 76
Metals Fight Back--Oct, p 85
New Inorganic Filaments Are Stiffer and Lighter Than Metals--Feb, p 82
New Vanadium-Columbium Alloys Resist High and Low Temperatures--Dec, p 91
Rocket Engine--Apr, p 107
Three Ways to Protect Graphite Against High Temperatures--June, p 93

IRONS

Close Tolerance Malleable Iron Castings Now Available--Apr, p 90
Forecast '66-Metals--Jan, p 76
Metals Fight Back--Oct, p 85

JOINING AND FASTENING

Answers to Five Common Adhesive Problems--Feb, p 86
Contact Adhesives Bond Parts Quickly and Economically--Aug, p 76
Lap Seam Liquid Container--Apr, p 108
Practical Guide to Diffusion Bonding, A--Oct, p 76

Revolution in Materials Joining, The--Mar, p 64
Ultrasonics Joins Plastics Quickly and Simply--Sept, p 112

MAGNESIUM AND ITS ALLOYS

How to Protect Magnesium Against Corrosion--Apr, p 82
Metals Fight Back--Oct, p 85

MOLDING, MOLDINGS

Don't Overlook New, Improved Phenolics--Feb, p 72
Forecast '66-Plastics & Nonmetallics--Jan, p 82
High Production of Reinforced Plastic Parts--Sept, p 87
Umbrella Frame--Apr, p 100

MOLYBDENUM AND ITS ALLOYS

Coated Refractory Metals Beat Heat and Oxidation--July, p 83
Don't Overlook Refractory Metals for Corrosive Environments--Nov, p 106
Forecast '66-Metals--Jan, p 76
Rocket Engine--Apr, p 107

NICKEL AND ITS ALLOYS

Electroformed Nickel Moves Into the Home--July, p 97
Fluorescent Lamp--Apr, p 101
Forecast '66-Metals--Jan, p 76
Metals Fight Back--Oct, p 85

PLASTICS-REINFORCED

Asbestos Reinforced Plastics Resist Heat and Chemicals--Apr, p 92
Forecast '66-Plastics & Nonmetallics--Jan, p 82
High Production of Reinforced Plastic Parts--Sept, p 87
How Water Affects Plastics--Nov, p 93
Transmission Line Crossarm--Apr, p 110
What's New in Reinforded Plastics?--May, p 80

PLASTICS-THERMOPLASTICS

Acetal Plastics: Where Do They Stand?--Dec, p 86
Air Duct Clamp--Apr, p 112
Answers to Five Common Adhesive Problems--Feb, p 86
Automobile Wheel Cover--Apr, p 104
Composite Bearing--Apr, p 111
Cryogenic Face Seal--Apr, p 108
Electronic Instrument Case--Apr, p 105
Forecast '66-Plastics & Nonmetallics--Jan, p 82
Four-Shot Flash Cube--Apr, p 98
Helicopter Landing Light Cover--Apr, p 109
How to Select the Right Grade of ABS--June, p 83

How Water Affects Plastics--Nov, p 93
Irradiated Wood-Plastic Parts Are Tough and Dimensionally Stable--Oct, p 68
New Developments in Vinyl Coatings--Dec, p 106
Plastic Foams--May, p 87
Polyethylene Parts Are Tough and Durable--Nov, p 98
Pressure Hull for Underwater Observatory--Apr, p 106
Propylene Plastics--Aug, p 89
Ultrasonics Joins Plastics Quickly and Simply--Sept, p 112
Umbrella Frame--Apr, p 100
What's New in Nylon Plastics?--July, p 92

PLASTICS-THERMOSETS

Answers to Five Common Adhesive Problems--Feb, p 86
Don't Overlook New, Improved Phenolics--Feb, p 72
Forecast '66-Plastics & Nonmetallics--Jan, p 82
How Water Affects Plastics--Nov, p 93
Lap Seam Liquid Container--Apr, p 108
Plastic Foams--May, p 87
Printed Circuit Board--Apr, p 102
Transfer Molded Epoxies Upgrade Electronic Parts--Mar, p 76

POWDER METALLURGY

Composite Bearing--Apr, p 111
Forecast '66-Metals--Jan, p 76
How Well Do P/M Parts Resist Fatigue?--June, p 91

PRECIOUS METALS

Attitude Control Thruster--Apr, p 112
Metals Fight Back--Oct, p 85
Precious Metals Withstand Tough Environments--Sept, p 100

RUBBER

Forecast '66-Plastics & Nonmetallics--Jan, p 82
Helicopter Landing Light Cover--Apr, p 109
How to Protect Elastomer Parts From Ozone Attack--Aug, p 82
Low Temperature No Problem With New Elastomers--Apr, p 78

STAINLESS AND HEAT RESISTANT STEELS

Automotive Wheel Cover--Apr, p 104
Composite Coating Increases Life of Superalloy and Stainless Steel Parts--Sept, p 92
Cryogenic Face Seal--Apr, p 108
Forecast '66-Metals--Jan, p 76
Metals Fight Back--Oct, p 85
New PH Stainless Steels Are Stronger and Tougher--Sept, p 95
Pressure Hull for Underwater Observatory--Apr, p 106
Where Do We Stand in Welding High Strength Steels?--Nov, p 100

STEELS

Chromized Steel Sheet Resists Oxidation and Corrosion--May, p 78
Composite Bearing--Apr, p 111
Forecast '66-Metals--Jan, p 76
High Strength Steel Castings Stand Up in Rugged Environments--Feb, p 67
High Strength Steels Get Tougher--Dec, p 98
How To Avoid Brittle Fracture In Carbon Steel Structures--Aug, p 79
Metals Fight Back--Oct, p 85
Printed Circuit Board--Apr, p 102
Where Do We Stand in Welding High Strength Steels?--Nov, p 100

TESTING AND INSPECTION

Materials Testing Equipment Review--June, p 99
New Nondestructive Tests Improve Quality and Safety--Sept, p 106

TIN

New Developments in Tin Improve Product Performance--Aug, p 84

TITANIUM AND ITS ALLOYS

Forecast '66-Metals--Jan, p 76
Metals Fight Back--Oct, p 85

WOOD

Irradiated Wood-Plastic Parts Are Tough and Dimensionally Stable--Oct, p 68

ZINC

Automobile Wheel Cover--Apr, p 104
Metals Fight Back--Oct, p 85
